The Precariat - Guy Standing 2011-02-28
This book presents the Precariat – an emerging class, comprising the rapidly growing number of people facing lives of insecurity, moving in and out of jobs that give little meaning to their lives. Guy Standing argues that this class is producing instabilities in society. Although it would be wrong to characterise members of the Precariat as victims, many are frustrated and angry. The Precariat is dangerous because it is internally divided, leading to the villainisation of migrants and other vulnerable groups. Lacking agency, its members may be susceptible to the siren calls of political extremism. To prevent a 'politics of inferno', Guy Standing argues for a 'politics of paradise', in which redistribution and income security are reconfigured in a new kind of Good Society, and in which the fears and aspirations of the Precariat are made central to a progressive strategy.

Food at Work - Christopher Wanjek 2005
This volume establishes a clear link between good nutrition and high productivity. It demonstrates that ensuring that workers have access to nutritious, safe and affordable food, an adequate meal break, and decent conditions for eating is not only socially important and economically viable but a profitable business practice, too. Food at Work sets out key points for designing a meal program, presenting a multitude of "food solutions" including canteens, meal or food vouchers, mess rooms and kitchenettes, and partnerships with local vendors. Through case studies from a variety of enterprises in twenty-eight industrialized and developing countries, the book offers valuable practical food solutions that can be adapted to workplaces of different sizes and with different budgets.

Greece's New Political Economy - George Pagoulatos 2003-03-12

This book will be an indispensable reference work for anyone seeking to understand the Greek political economy in the light of major contemporary debates.

International Political Economy and Mass Communication in Chile - Matt Davies 1999-06-19
Examines power and hegemony in the international political economy from the perspective of the various agents who produce its systems.

Rising densities of human settlements, migration and transport to reduce distances to market, and specialization and trade facilitated by fewer international divisions are central to economic development. The transformations along these three dimensions density, distance, and division are most noticeable in North America, Western Europe, and Japan, but countries in Asia and Eastern Europe are changing in ways similar in scope and speed. 'World Development Report 2009: Reshaping Economic Geography' concludes that these spatial transformations are essential, and should be encouraged. The conclusion is not without controversy. Slum-dwellers now number a billion, but the rush to cities continues. Globalization is believed to benefit many, but not the billion people living in lagging areas of developing nations. High poverty and mortality persist among the world's 'bottom billion', while others grow wealthier and live longer lives. Concern for these three billion often comes with the prescription that growth must be made spatially balanced. The WDR has a different message: economic growth is seldom balanced, and efforts to spread it out prematurely will jeopardize progress. The Report: documents how production becomes more concentrated spatially as economies grow, proposes economic integration as the principle for promoting successful spatial transformations, revisits the debates on urbanization, territorial development, and regional integration and shows how today's developers can reshape economic geography.

Human Rights and Comparative Foreign Policy - David P. Forsythe 2006-09-30
Human Rights And Comparative Foreign Policy Is The First Book In English To Examine The Place Of Human Rights In The Foreign Policies Of A Wide Range Of States During Contemporary Times. The Book Is Also Unique In Utilizing A Common Framework Of Analysis For All 10 Of The Country Or Regional Studies Covered. This Framework Treats Foreign Policy As The Result Of A Two-Level Game In Which Both Domestic And Foreign Factors Have To Be Considered. Leading Experts From Around The World Analyze Both Liberal Democratic And Other Foreign Policies On Human Rights. A General Introduction And A Systematic Conclusion Add To The Coherence Of The Project. The Authors Note The Increasing Attention Given To Human Rights Issues In Contemporary Foreign Policy. At The Same Time, They Argue That Most States, Including Liberal Democratic States That Identify With Human Rights, Are Reluctant Most Of The Time To Elevate Human Rights Concerns To A Level Equal To That Of Traditional Security And Economic Concerns. When States Do Seek To Integrate Human Rights With These And Other Concerns, The Result Is Usually Great Inconsistency In Patterns Of Foreign Policy. The Book Further Argues That Different States Bring Different Emphases To Their Human Rights Diplomacy, Because Of Such Factors As National Political Culture And Perceived National Interests. In The Last Analysis States Can Be Compared Along Two Dimensions Pertaining To Human Rights: Extent To Which They Are Oriented Toward An International Rather Than National Conception Of Rights; And Extent To Which They Are Oriented Toward International Rather Than National Action To Protect Human Rights.

Uniting of Europe - Ernst B. Haas 2020-11-15
The University of Notre Dame Press is pleased to bring Ernst Haas's classic
work on European integration, The Uniting of Europe, back into print. First published in 1958 and last printed in 1968, this seminal volume is the starting point for anyone interested in the pre-history of the European Union. Haas uses the European Coal and Steel Community (ECSC) as a case study of the community formation processes that occur across traditional national and state boundaries. Haas points to the ECSC as an example of an organization with the "power to redirect the loyalties and expectations of political actors." In this pathbreaking book Haas contends that, based on his observations of the actual integration process, the idea of a "united Europe" took root in the years immediately following World War II. His careful and rigorous analysis tracks the development of the ECSC, including, in his 1968 preface, a discussion of the eventual loss of the individual identity of the ECSC through its absorption into the new European Community. Featuring a new introduction by Haas analyzing the impact of his book over time, as well as an updated bibliography, The Uniting of Europe is a must-have for political scientists and historians of modern and contemporary Europe. This book is the inaugural volume of Notre Dame's new Contemporary European Politics and Society Series.

The Neoliberal Age? - Aled Davies 2021-12-07
The late twentieth and early twenty-first centuries are commonly characterised as an age of ‘neoliberalism’ in which individualism, competition, free markets and privatisation came to dominate Britain’s politics, economy and society. This historical framing has proven highly controversial, within both academia and contemporary political and public debate. Standard accounts of neoliberalism generally focus on the influence of political ideas in reshaping British politics; according to this narrative, neoliberalism was a right-wing ideology, peddled by political economists, think-tanks and politicians from the 1930s onwards, which finally triumphed in the 1970s and 1980s. The Neoliberal Age? suggests this narrative is too simplistic. Where the standard story sees neoliberalism as right-wing, this book points to some left-wing origins, too; where the standard story emphasises the agency of think-tanks and politicians, this book shows that other actors from the business world were also highly significant. Where the standard story can suggest that neoliberalism transformed subjectivities and social lives, this book illuminates other forces which helped make Britain more individualistic in the late twentieth century. The analysis thus takes neoliberalism seriously but also shows that it cannot be the only explanatory framework for understanding contemporary Britain. The book showcases cutting-edge research, making it useful to researchers and students, as well as to those interested in understanding the forces that have shaped our recent past.

He sees development as 'a Sisyphean task of trying to impose value-oriented rationality on realities that remain permanently recalcitrant to such reality' precisely because its key actors - be they the state, social groups, development agencies, individual 'experts', or the market - cannot be assumed to be either benevolent or consistently rational.

Merchants of Labour - International Labour Office 2006
More workers are crossing national borders to look for jobs than ever before. Many migrants seek overseas employment with the help of agents or intermediaries. These "merchants of labour" include relatives who finance a migrant's trip, provide housing and arrange for a job abroad; public employment services; and private recruitment agencies. They also comprise an insalubrious underworld of smugglers and traffickers. The agents who recruit and deploy migrant workers are at the heart of the evolving migration infrastructure, i.e. the network of business and personal ties that is creating a global labour market. This book highlights best practices in the activities and regulation of these merchants of labour as well as innovative strategies to protect migrant workers, underlining the contribution of ILO standards. It covers a broad range of national and regional experiences and puts "merchants of labour" in the wider context of changing employment relationships in globalizing labour markets. The papers it contains are an important contribution to understanding a major mechanism facilitating the growth of the migrant labour force.

Can Responsible Government Survive in Australia? - David Hamer 1994

Democratization in Morocco - Lise Storm 2007-10-29
This book explores the political games of the Moroccan democratization process in the period from independence in 1956 until 2006. By combining a great degree of political theory with empirical material on Morocco, it analyzes the strategies and actions of the various political actors and evaluates the level of democracy present in the country after the adoption of new constitutions in 1962, 1970, 1972, 1980, 1992 and 1996. Lise Storm demonstrates that in at least some instances, democratization has been more than simply a survival strategy – every so often, key figures within the political elite have taken the democratization process further than strictly needed for them to stay in power. In the case of Morocco, it has been the monarch who on more than one occasion has moved the country further towards the democratic ideal than he necessarily had to, and that sometimes even against the wishes of one or more of the established political parties. This book illustrates how the Moroccan political parties, like so many of their counterparts in the region, have become the main obstacle to further democratization as most of them have never honoured – or appear to have abandoned – the key function of political parties: popular representation. Democratization in Morocco will be a very valuable contribution to students and researchers interested in the dynamics behind the Moroccan democratization and the role of electoral politics in North African and Middle Eastern politics.

Capital as Power - Jonathan Nitzan 2009-06-02
Conventional theories of capitalism are mired in a deep crisis: after centuries
of debate, they are still unable to tell us what capital is. Liberals and Marxists both think of capital as an ‘economic’ entity that they count in universal units of ‘utils’ or ‘abstract labour’, respectively. But these units are totally fictitious. Nobody has ever been able to observe or measure them, and for a good reason: they don’t exist. Since liberalism and Marxism depend on these non-existing units, their theories hang in suspension. They cannot explain the process that matters most – the accumulation of capital. This book offers a radical alternative. According to the authors, capital is not a narrow economic entity, but a symbolic quantification of power. It has little to do with utility or abstract labour, and it extends far beyond machines and production lines. Capital, the authors claim, represents the organized power of dominant capital groups to reshape – or reorder – their society. Written in simple language, accessible to lay readers and experts alike, the book develops a novel political economy. It takes the reader through the history, assumptions and limitations of mainstream economics and its associated theories of politics. It examines the evolution of Marxist thinking on accumulation and the state. And it articulates an innovative theory of ‘capital as power’ and a new history of the ‘capitalist mode of power’.

The Corporate Rich and the Power Elite in the Twentieth Century demonstrates exactly how the corporate rich developed and implemented the policies and created the government structures that allowed them to dominate the United States. The book is framed within three historical developments that have made this domination possible: the rise and fall of the union movement, the initiation and subsequent limitation of government social-benefit programs, and the postwar expansion of international trade. The book’s deep exploration into the various methods the corporate rich used to centralize power corrects major empirical misunderstandings concerning all three issue-areas. Further, it explains why the three ascendant theories of power in the early twenty-first century—interest-group pluralism, organizational state theory, and historical institutionalism—cannot account for the complexity of events that established the power elite’s supremacy and led to labor’s fall. More generally, and convincingly, the analysis reveals how a corporate-financed policy-planning network, consisting of foundations, think tanks, and policy-discussion groups, gradually developed in the twentieth century and played a pivotal role in all three issue-areas. Filled with new archival findings and commanding detail, this book offers readers a remarkable look into the nature of power in America during the twentieth century, and provides a starting point for future in-depth analyses of corporate power in the current century.

_The Indonesian Military After the New Order_ – Sukardi Rinakit 2005

"Because the military is an integral part of Indonesia's power structure, it is of interest to anyone studying Indonesian affairs. This volume is the first study to address the role of the military in post-Soeharto Indonesia. The author is a former ghostwriter at the Indonesian Ministries of Home Affairs and Defence. He is privy to the internal dynamics of the military and has personally interviewed such untouchable figures as former President Soeharto. As such, this is an up-to-date, well-informed study providing a useful
contribution to the literature, particularly with regard to the younger generation of the military."--BOOK JACKET.

**Freedom in the World** - Aili Piano 2006
Freedom in the World, the Freedom House flagship survey whose findings have been published annually since 1972, is the standard-setting comparative assessment of global political rights and civil liberties. The survey ratings and narrative reports on 192 countries and a group of select territories are used by policy makers, the media, international corporations, and civic activists and human rights defenders to monitor trends in democracy and track improvements and setbacks in freedom worldwide. Press accounts of the survey findings appear in hundreds of influential newspapers in the United States and abroad and form the basis of numerous radio and television reports. The Freedom in the World political rights and civil liberties ratings are determined through a multi-layered process of research and evaluation by a team of regional analysts and eminent scholars. The analysts used a broad range of sources of information, including foreign and domestic news reports, academic studies, nongovernmental organizations, think tanks, individual professional contacts, and visits to the region, in conducting their research. The methodology of the survey is derived in large measure from the Universal Declaration of Human Rights, and these standards are applied to all countries and territories, irrespective of geographical location, ethnic or religious composition, or level of economic development.

The Comparative Survey of Freedom is an institutional effort by Freedom House to monitor the progress and decline of political rights and civil liberties in 191 nations and 59 related territories. These year-end reviews of freedom began in 1955, when they were called the Balance Sheet of Freedom and, still later, the Annual Survey of the Progress of Freedom. This program was expanded in the early 1970s, and has appeared in Freedom Review since 1973. It has also been issued in a more developed context as a yearbook since 1978. Since 1989, the Survey project has been a year-long effort produced by regional experts, consultants and human rights specialists. The Survey derives its information from a wide range of sources. Most valued of these are the many human rights activists, journalists, editors and political figures around the world who keep us informed of the human rights situation in their countries. Throughout the year. Freedom House personnel regularly conduct fact-finding missions to gain
more in-depth knowledge of the vast political transformations affecting our world. During these week-to-month-long investigations, we make every effort to meet a cross-section of political parties and associations, human rights monitors, religious figures, representatives of both the private sector and trade union movement, academics and journalists. During the past year, Freedom House staff traveled to numerous countries throughout most of the world's geographical and political regions. The Survey project team also consults a vast array of published source materials, ranging from the reports of other human rights organizations to often rare, regional newspapers and magazines. This year's Survey team includes: Adrian Karatnycky, Martin Edwin Anderson, Kristen Guida, Marshall Freeman Harris, Thomas R. Lansner, Arch Puddington, Leonard R. Sussman, and George Zarycky. The general editor of Freedom in the World is Roger Kaplan; the managing editor is Tara Kelly. This year's research coordinator was Charles Graybow.

**Governing Post-War Britain** - Glen O'Hara 2012-04-11

Glen O'Hara draws a compelling picture of Second World War Britain by investigating relations between people and government: the electorate's rising expectations and demands for universally-available social services, the increasing complexity of the new solutions to these needs, and mounting frustration with both among both governors and governed.
